Market entry

Esfahan Steel Company

November 2021

Market entry

Mobarakeh Steel Company

Our core services

Mechanical room design and construction

Design and execution of all types of industrial mechanical rooms, including preparation of the required technical drawings.

Fabrication and production

Fabrication and installation of all types of steel structures and pre engineered steel buildings.

Maintenance and repair

Complete execution of maintenance and repair activities for industrial units.

Tank design and construction

Fabrication and installation of tanks, electrostatic precipitators, dust collectors and industrial bunkers.

Industrial piping

Execution of industrial and building piping works, specifically for factories and refineries.

Skilled workforce supply

Supply of the skilled personnel required by factories and industrial units.

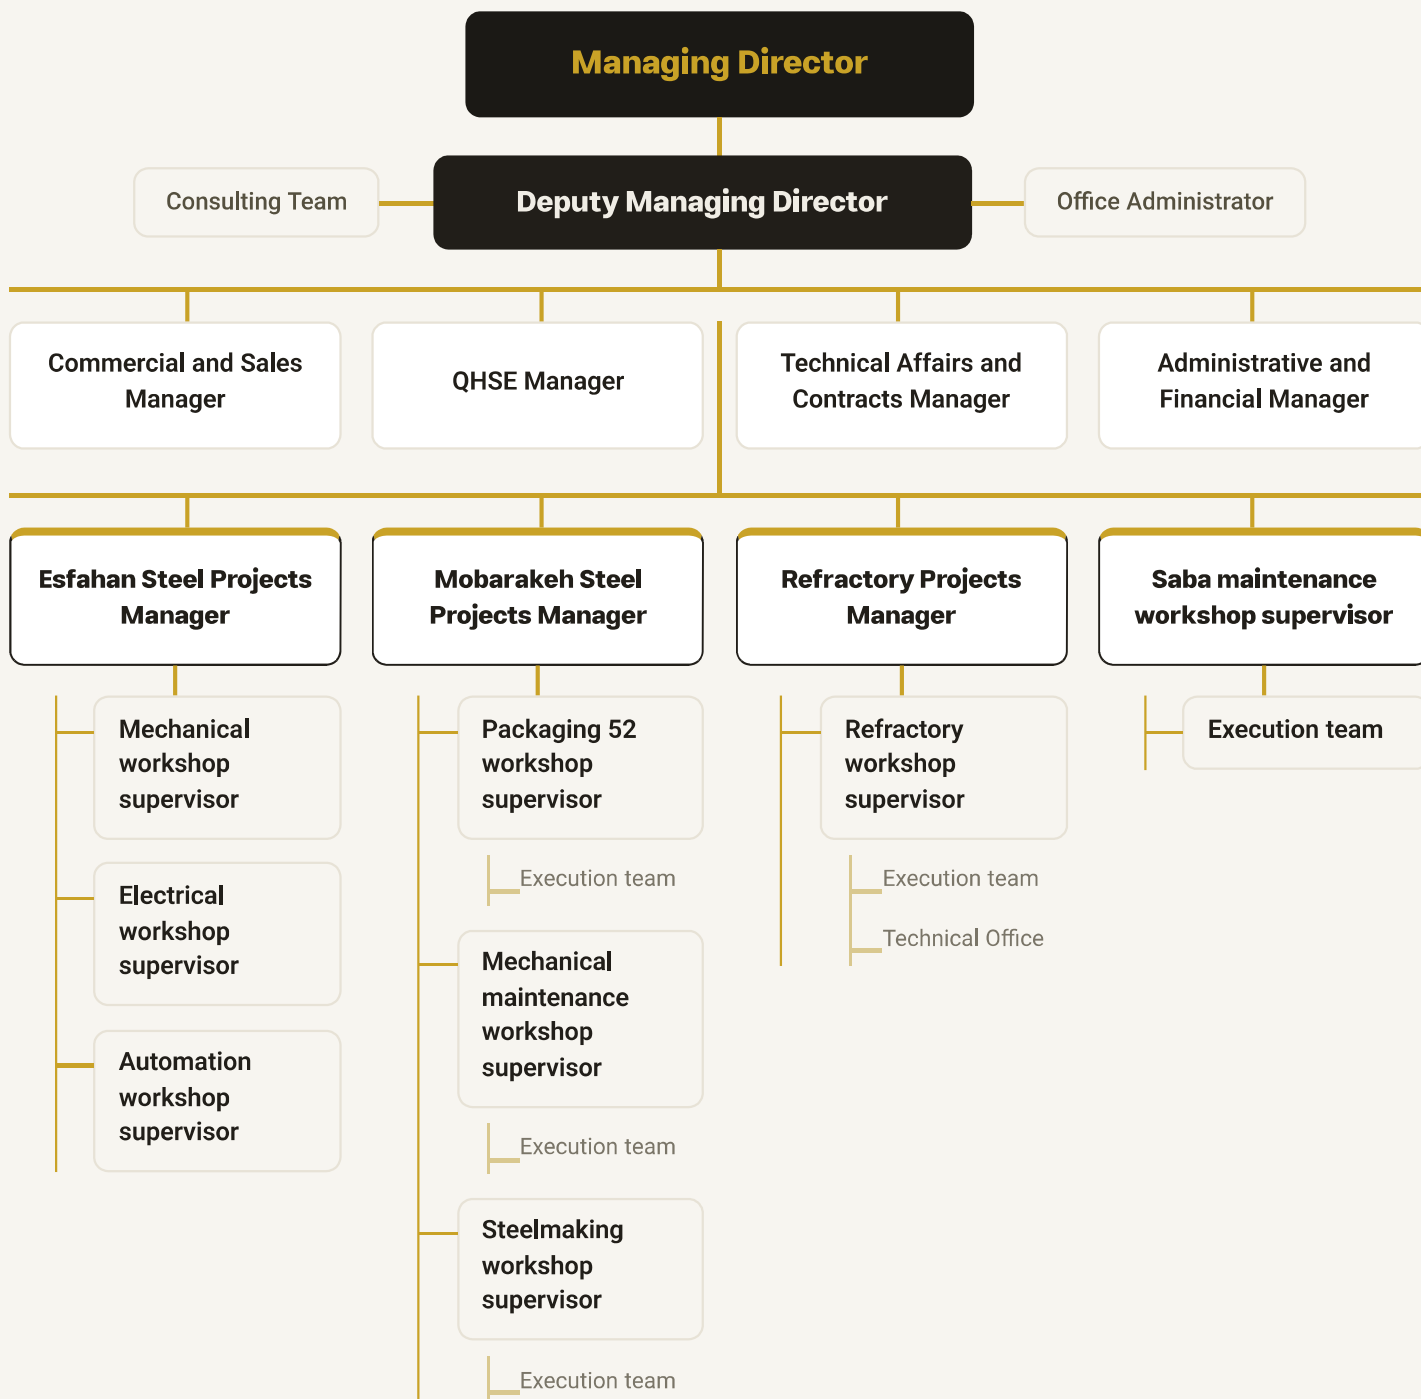

Services are delivered on a C, PC and EPC basis in the large steel and energy industries, with execution teams stationed on the client's site.

Our main clients

Mark	Company name	Field of activity
	Esfahan Steel Company	Production of structural steel
	Mobarakeh Steel Company	Production of steel, galvanized and colour coated sheets
	Saba Steel Complex	Production of hot rolled steel sheet
	Taraz Steel Shahrekord	Production of automotive sheet
	Pooyesh Construction Co. (EPCESCO)	Engineering and construction of industrial projects
	Azar Refractories Co.	Production of industrial refractory products

Fields of activity for Saba Steel Complex and Taraz Steel Shahrekord are awaiting client confirmation.

Social responsibility

Recognising that it holds a responsibility towards the society in which it operates, the company embraces its role in Corporate Social Responsibility: the set of duties and commitments it should fulfil to protect, care for and support the community it works in. Corporate Social Responsibility (CSR) is divided into three categories:

1. Environmental social responsibility

In this form of social responsibility the company places a large part of its focus on protecting the environment and natural resources, and accordingly cooperates and participates in afforestation work and environmental projects.

2. Philanthropic social responsibility

In this form of CSR the company sees its responsibility in providing social services and resolving social problems, and works towards them through a range of campaigns.

3. Ethical social responsibility

At this level the ethical dimension of social responsibility carries the greater weight. It includes paying employees more through higher bonuses, creating opportunities for the unemployed, and avoiding work with companies that hold a negative record and reputation.

Environment

Sustainable employment

Support for working children
